Date 25.01.2018

Dear Residents,

Subject : High Tech Advance Security System.

It has been observed that in recent past because of certain happening the security system requires further strenthning. All of you must have observed that of late number of maids / Car Cleaner / Driver has been steadily increasing. The Police Department has advised us to have servants / maids Identity be got verified by them.

In Order to mitigate all this and to met out the present needs we require to have advanced Technological System. There for it has been decided by the managing committee to introduce digital security system in the society the working of the said system was explain at length by the service provider which to us appears to be very usefull, foolproof and effective. The charges for said system have been negotiated with the service provider and they have agreed to provide services at a very nominal rate of Rs.30/ per month per flat. The amount so charged of course will be funded by the society. The vender has been very accomdative and generous and has agreed to give free trial of the working of the system for the initial first three months.

They have further agreed to conduct a work shop / Orientation Programme for the convenience of the residents in the society premises to explain as to how the whole system / advantages of the digital working.

For the above purpose it is proposed to have a work shop on the 28th day of January 2018.

All the residents of the society flats are requested to please assemble in the society office at 11 AM on 28/01/2018 to familirise them selves with the working of the entire system.

For the information of the resident the similar services are being provided by the provider in sum of the near by societies. The feedback collected from such socities is very encouraging and usefull. In view of the usefulness & effective ness of the system we urge upon all the residents to please avail the services without any further loss of time.

With warm Regards

B.K. BAJPAI
President
