Sector-9, Plot No. 50, Rohini, Delhi-110085

'Oriental Apartment'

30.3.2018

Dear Residents,

Re.: Water Supply by Delhi Jal Board

Of late we are getting erratic supply of water from MCD, Delhi Jal Board on daily basis. Sometimes it is normal and sometimes it gives us jitters to us as to whether we will be able to provide water to the residents to meet their daily requirement. In this connection news has also appeared prominently in leading newspapers that Haryana Government has stopped supplying its normal quota to Delhi Government. Delhi Jal Board does not have enough water in the reservoir to cater needs of Delhi citizens for long till the dispute between Haryana and Delhi is sorted out. Thus there is a water crisis in Delhi and it has come to our notice that some of the societies in Rohini are using borewater to meet the needs of their residents. As such all the residents are requested to use water judiciously by adopting following:-

1. Turn off the tap while washing utensils in the kitchen.
2. Turn off the tap while washing clothes.
3. Turn off the tap while shaving.
4. Take bucket for bath instead of using shower.
5. Use half flush for daily nature call.
6. Use bucket for washing car instead of hosing it down.
7. Used mop water can be used to water plants and gardening.

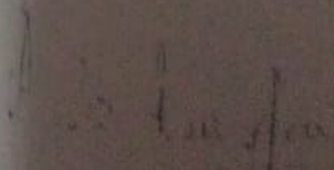

As we all know recently news appeared in the newspaper that South Africa is facing acute shortage of water and they are on the verge of evacuating the citizens of Capetown because of water scarcity. People and animal are dying for lack of water. Further it was also mentioned in the newspaper by the historians/researchers that the future wars will be fought for water and not for territories.

-2-

As explained above you will appreciate that saving and misuse of water will serve dual purpose as far as we the residents of Oriental Apartment are concerned. Less consumption of water will mean that water bill will be within our limits and further less consumption means less consumption of power thereby reducing the power bill also. Thus you will appreciate that by doing so we will be killing two birds with one stone. Please note that if we fail to do our duty in the right prospective we will be left with no option but to ration the water by pumping water into overhead tanks once a day that is 6.00 a.m. to 10.00 a.m. as against twice a day being done presently. You will appreciate that a bucket of water saved will save the life of other residents. Therefore we sincerely request all of you to please cooperate and use water judiciously.

Last but not the least we are getting reports that the residents are not parking their cars in a disciplined manner as a result of which sometime some of the residents are feeling difficulty in taking out the car. To mitigate this problem of indiscipline parking we are engaging the services of some valeting agency who will come and inspect the space and suggest as to how and in which fashion the cars should be parked so as to avoid any inconvenience to anyone in the society.

With regards,

President / Secretary
